

Project Development Phase

User Acceptance Testing (UAT)

Date	30 September 2026	Team ID	6ab75b2068850e4f5dce0e19
Project Name	Auto Ticket Classification using Flow Designer	Maximum Marks	As per SkillWallet UAT activity

Project Overview

Project Description: ServiceNow Flow Designer automatically classifies school IT support tickets using predefined keyword rules, assigns Category and Subcategory, stores ticket information in Ticket Records, and supports caller email notification.

Project Version: Implemented project workflow

Testing Period: 30 September 2026

Testing Scope

Ticket creation and classification; Network/Wi-Fi classification; Hardware/Projector classification; caller email notification generation; and storage of classified ticket information in Ticket Records.

Testing Environment

Application: ServiceNow Developer instance **Table:** Ticket Records [u_ticket_records] **Workflow:** Auto Ticket Classification using Flow Designer

Test Cases & Results

Test Case ID	Scenario	Test Steps	Expected Result	Actual Result	Tester	Date	Pass/Fail
TC-001	Network / Wi-Fi classification	1. Create/open a Ticket Record. 2. Test a Wi-Fi issue. 3. Check Category and Subcategory.	Category = Network Subcategory = Wi-Fi	Ticket TIC0001001 shows Category = Network and Subcategory = Wi-Fi.	Wilson Thomas A.	30 Sep 2026	PASS
TC-002	Email notification generation	1. Create a ticket with a caller. 2. Allow the flow to process the ticket. 3. Check whether the email notification is generated.	Configured caller notification is generated for the created ticket.	Email notification was generated and checked.	Dinesh S.	30 Sep 2026	PASS

TC-003	Hardware / Projector classification	1. Create/open a Ticket Record. 2. Test a projector issue. 3. Check Category and Subcategory.	Category = Hardware Subcategory = Projector	Ticket TIC0001006 shows Category = Hardware and Subcategory = Projector.	Krishna Kumar T.	30 Sep 2026	PASS
