Customer Problem Statement

Problem Statement (PS-1)	
I am (Customer)	School IT helpdesk staff
I'm trying to	Classify incoming IT support tickets and assign the correct category and subcategory.
But	I have to review and classify tickets manually.
Because	Ticket classification depends on identifying the issue from the ticket description.
Which makes me feel	The ticket handling process is time-consuming and inefficient.

Problem Statement (PS-2)	
I am (Customer)	A student/caller raising an IT support ticket
I'm trying to	Submit my IT issue and receive confirmation that my ticket has been created.
But	The ticket needs to be correctly classified and processed before it can be handled efficiently.
Because	Manual classification can delay the initial ticket-handling process.
Which makes me feel	Uncertain about whether my request has been correctly processed.
